

THERMAL SHUT-OFF ASSEMBLIES

FOR QUARTER-TURN VALVES

LT Series

MT Series

HT Series

BT Series

FLP SERIES COMPLETE ASSEMBLIES

BI-TORQ Valve Automation's complete line of API 607 certified quarter-turn valves suit a wide range of applications. Carbon and stainless steel ball valves are available in 1/4" through 6" sizes with ANSI flanges and NPT or socket weld ends. Fire safe high performance butterfly valves come in 2" through 24" sizes.

ONE VALVE DOES IT ALL

Our unique design allows a single valve to be used as an armed fail safe assembly *AND* as a manually operated valve, saving money, space and maintenance time. Smaller valves use the standard handle while larger ball valves and all butterfly valves have a declutchable manual override.

FL SERIES AML & SPECIFIED VALVES

In addition to our own valves, we manufacture customized assemblies for a range of customer-specified quarter turn valves. In addition, a retrofit assembly can be used where safety regulations dictate the addition of a fusible link on valves currently installed.

PRODUCT CONFIGURATOR

The product configurator on bitorq.com allows users to build assemblies, create part numbers, and download product documentation. Registered users can get CAD drawings and Solidworks models ready to drop into a customer installation schematic. Product models can be compared with all available options so that engineers and specifiers get the unit they need.

BI-TORQ fusible link assemblies are used in a wide range of applications, including:

- TANK FARMS
- REFINERIES
- CHEMICAL PRODUCTION
- AIRPORT AND TRUCK FUELING STATIONS
- PETROCHEMICAL AND BIOFUELS
- PAINT AND TOXIC CHEMICALS

BI-TORQ'S THERMAL SHUTDOWN FIRE SAFE VALVES HELP MEET INSURANCE REQUIREMENTS

FEATURES

- AUTOMATIC SHUT-OFF IN CASE OF FIRE
- API 607 FIRE SAFE APPROVAL ON ALL BALL AND BUTTERFLY VALVES
- VALVE CAN BE OPERATED EVEN WHILE SPRING PACK IS ARMED (LT & MT SERIES)
- UL OR FM-APPROVED LINKS AVAILABLE
- HEAVY DUTY ARMING DEVICE
- FACTORY ASSEMBLED AND TESTED
- LINK TEMPERATURES FROM 165°F TO 360°F
- FAIL OPEN OR FAIL CLOSED ORIENTATIONS FOR A VARIETY OF APPLICATIONS

FLP-LT SERIES 1/4" THROUGH 1" NPT

FLP-LT series fusible link shown with FM approved actuator

PART NUMBERS

FLP-LT-059-***-XXX-BV-FS	includes 316SS 3-piece API 607 fire safe valve
FLP-LT-059-***-XXX-BV-FW	includes WCB/SS 3-piece API 607 fire safe valve

***: Select a link temperature from the chart below.

LT SERIES FOR VALVES UP TO 150 INCH POUNDS OF TORQUE

LT-Series assembly shown with red safety link installed

LT SERIES FEATURES

- FOR SMALLER FIRE SAFE BALL AND PLUG VALVES DEPENDING ON VALVE TORQUE, MEDIA AND LINE PRESSURE
- PROVIDES AUTOMATIC CLOSURE IN THE EVENT OF FIRE
- VALVE CAN BE OPERATED MANUALLY EVEN WHILE ARMED
- SOLDERED FUSIBLE LINKS AVAILABLE IN A VARIETY OF TEMPERATURES
- AVAILABLE WITH API 607 FIRE SAFE BALL VALVES WITH ANSI 150# OR 300# FLANGES, SOCKET WELD OR NPT ENDS
- FM APPROVED ACTUATOR

1	valve mounting bracket	7	retaining arm
2	spring closing arm	8	fusible link(s)
3	valve stop	9	mounting plate fasteners
4	spring pack (03 or 05)	10	retaining studs
5	valve handle	11	spacer/washer
6	fusible link mounting plate	12	safety link (for shipping only)

HEAVY DUTY SPRING PACK

The armed spring pack features weatherproof sealed spring housing and corrosion resistant epoxy paint. The reliable low stress clock springs assure quick closing action when the fusible links yield.

CUSTOMIZED MOUNTING HARDWARE

A heavy-duty gauge bracket and stainless steel top plate provide the durable, secure construction that BI-TORQ® Valve Automation products are known for. An all stainless bracket, coupling, arming plate and hardware kit also are available.

FACTORY ASSEMBLED

All BI-TORQ® Valve Automation fusible link valves are assembled by factory-trained personnel. The units then are armed with a protective safety link for shipping purposes.

RELIABLE FUSIBLE LINKS

BI-TORQ® Valve Automation fusible links are designed to remain secure until releasing the spring pack when the desired temperature is reached. Soldered fusible links are available in these temperature ranges:

LINK PART NUMBER	LINK YIELD TEMPERATURE	MAXIMUM AMBIENT TEMPERATURE
FL-1-165	165°F/74°C	135°F/57°C
FL-1-212	212°F/100°C	185°F/82°C
FL-1-286	286°F/138°C	253°F/123°C
FL-1-360	360°F/182°C	330°F/166°C

Please consult factory for special order links

NOTE: Links should be replaced on an annual basis as part of a regular maintenance program. Links are not rated for use in corrosive atmospheres.

The policy of BI-TORQ Valve Automation is one of continuous improvement. We reserve the right to alter the product as described and illustrated without notice.

MT SERIES FOR VALVES UP TO 830 INCH POUNDS OF TORQUE

MT-Series assembly shown with red safety link installed

MT SERIES FEATURES

- FOR MID-SIZED FIRE SAFE BALL AND PLUG VALVES DEPENDING ON VALVE TORQUE, MEDIA AND LINE PRESSURE
- PROVIDES AUTOMATIC CLOSURE IN THE EVENT OF FIRE
- VALVE CAN BE OPERATED MANUALLY EVEN WHILE ARMED
- SOLDERED FUSIBLE LINKS AVAILABLE 165°F THRU 360°F
- AVAILABLE WITH API 607 FIRE SAFE BALL VALVES WITH ANSI FLANGES, SOCKET WELD AND NPT ENDS, OR BUTTERFLY VALVES
- FM APPROVED ACTUATOR

1	valve mounting bracket	7	arming lever
2	spring closing arm	8	fusible link (1)
3	valve stop	9	lever retaining arm
4	spring pack (07)	10	retaining studs
5	valve handle	11	safety link (for shipping only)
6	fusible link mounting plate	12	detachable arming handle

HEAVY DUTY SPRING PACK

The armed spring pack features weatherproof sealed spring housing and corrosion resistant epoxy paint. The reliable low stress clock springs assure quick closing action when the fusible links yield.

CUSTOMIZED MOUNTING HARDWARE

A heavy-duty gauge bracket and stainless steel top plate provide the durable, secure construction that BI-TORQ® Valve Automation products are known for. An all stainless bracket, coupling, arming plate and hardware kit also are available.

FACTORY ASSEMBLED

All BI-TORQ® Valve Automation fusible link assemblies are assembled by factory-trained personnel. The units then are armed with a protective safety link for shipping purposes.

RELIABLE FUSIBLE LINKS

BI-TORQ® Valve Automation fusible links are designed to remain secure until releasing the spring pack when the desired temperature is reached. Soldered fusible links are available in these temperature ranges:

LINK PART NUMBER	LINK YIELD TEMPERATURE	MAXIMUM AMBIENT TEMPERATURE
FL-1-165	165°F/74°C	135°F/57°C
FL-1-212	212°F/100°C	185°F/82°C
FL-1-286	286°F/138°C	253°F/123°C
FL-1-360	360°F/182°C	330°F/166°C

Please consult factory for special order links

NOTE: Links should be replaced on an annual basis as part of a regular maintenance program. Links are not rated for use in corrosive atmospheres.

The policy of BI-TORQ Valve Automation is one of continuous improvement. We reserve the right to alter the product as described and illustrated without notice.

HT SERIES FOR VALVES UP TO 1800 INCH POUNDS OF TORQUE

HT SERIES FEATURES

- FOR FIRE SAFE BALL, PLUG VALVES, AND BUTTERFLY VALVE SIZES DEPENDING ON VALVE TORQUE, MEDIA AND LINE PRESSURE
- PROVIDES AUTOMATIC CLOSURE IN THE EVENT OF FIRE
- VALVE CAN BE OPERATED MANUALLY WITH DECLUTCHABLE GEAR AFTER DISARMING
- SOLDERED FUSIBLE LINKS AVAILABLE IN A VARIETY OF TEMPERATURES
- API 607 FIRE SAFE BALL OR BUTTERFLY VALVES AVAILABLE AS PART OF A PACKAGE
- FM APPROVED ACTUATOR

The HT (high-torque) fusible link assembly incorporates a declutchable gear operator to normally operate the valve after disarming.

TOP VIEW ARMED

HEAVY DUTY SPRING PACK

The armed spring pack features weatherproof sealed spring housing and corrosion resistant epoxy paint. The reliable low stress clock springs assure quick closing action when the fusible links yield.

CUSTOMIZED MOUNTING HARDWARE

A heavy-duty gauge bracket and stainless steel top plate provide the durable, secure construction that BI-TORQ® Valve Automation products are known for. An all stainless bracket, coupling, arming plate and hardware kit also are available.

FACTORY ASSEMBLED

All BI-TORQ® Valve Automation fusible link assemblies are assembled by factory-trained personnel. The units then are armed with a protective safety link for shipping purposes.

DECLUTCHABLE MANUAL OVERRIDE

The HT-series features a declutchable gear operator to arm the assembly or to operate the valve once the links are disengaged.

RELIABLE FUSIBLE LINKS

BI-TORQ Valve Automation fusible links are designed to remain secure until releasing the spring pack when the desired temperature is reached. Soldered fusible links are available in these temperature ranges:

1	valve mounting bracket	7	stop plate
2	declutch lever	8	fusible link (6)
3	declutch manual override	9	pivot arm
4	spring pack (10, 12)	10	mounting studs
5	valve coupler	11	fusible link mounting plate
6	declutch mounting plate		

NOTE: Links should be replaced on an annual basis as part of a regular maintenance program. Links are not rated for use in corrosive atmospheres.

LINK PART NUMBER	LINK YIELD TEMPERATURE	MAXIMUM AMBIENT TEMPERATURE
FL-1-165	165°F/74°C	135°F/57°C
FL-1-212	212°F/100°C	185°F/82°C
FL-1-286	286°F/138°C	253°F/123°C
FL-1-360	360°F/182°C	330°F/166°C

Please consult factory for special order links

NOTE: MODEL HT-129 REQUIRES K SERIES LINKS; PLEASE REFER TO THOSE PART NUMBERS FOR TEMPERATURES AND RATINGS.

BT SERIES FOR VALVES UP TO 21,000 INCH POUNDS OF TORQUE

BT SERIES FEATURES

- FOR FIRE SAFE BALL, PLUG VALVES, AND BUTTERFLY VALVE SIZES DEPENDING ON VALVE TORQUE, MEDIA AND LINE PRESSURE
- PROVIDES AUTOMATIC CLOSURE IN THE EVENT OF FIRE
- VALVE CAN BE OPERATED MANUALLY WITH DECLUTCHABLE GEAR AFTER DISARMING
- SOLDERED FUSIBLE LINKS AVAILABLE IN A VARIETY OF TEMPERATURES
- API 607 FIRE SAFE BALL OR BUTTERFLY VALVES AVAILABLE AS PART OF A PACKAGE

The BT series assembly uses a declutchable gear to manually operate the valve after disarming.

HEAVY DUTY SPRING PACK

The armed spring pack features weatherproof sealed spring housing and corrosion resistant epoxy paint. The reliable low stress clock springs assure quick closing action when the fusible links yield.

CUSTOMIZED MOUNTING HARDWARE

A heavy-duty gauge bracket and top plate provide the durable, secure construction that AVK Carbo-Bond products are known for. An all stainless bracket, coupling, arming plate and hardware kit also are available.

FACTORY ASSEMBLED

All BI-TORQ thermal shutdown fire safe assemblies are assembled by factory-trained personnel. The units then are armed with a protective safety link for shipping purposes.

DECLUTCHABLE MANUAL OVERRIDE

The BT-series features a declutchable gear operator to arm the assembly or to operate the valve once the links are disengaged.

RELIABLE FUSIBLE LINKS

BI-TORQ fusible links are designed to remain secure until releasing the spring pack when the desired temperature is reached. Soldered type fusible links are available in these temperature ranges:

1	valve mounting bracket	9	fusible link retaining rod
2	valve coupler	10	fusible links (8)
3	declutchable override gear	11	spring pack stop assembly
4	spring pack mounting plate	12	locking trigger
5	spring pack/declutch coupler	13	safety cover plate
6	spring pack (14x, 14, 15, 16, 18)	14	rod end bearings
7	arming device mounting plate	15	shoulder bolts
8	safety stop pin	16	SupaLoops

LINK PART NUMBER	LINK YIELD TEMPERATURE	MAXIMUM AMBIENT TEMPERATURE
314165	165°F/74°C	135°F/57°C
314212	212°F/100°C	185°F/82°C
314280	286°F/138°C	253°F/123°C
314360	360°F/182°C	330°F/166°C

Please consult factory for special order links

OPTIONS FOR FUSIBLE LINK ASSEMBLIES

FUSIBLE LINK TYPES

FL-1: For LT, MT and HT-109 models

- Factory Mutual approved; UL and C-UL Listed
- Fusible Link Halves: Stainless Steel
- Fusible Assembly: Solder, Copper, Stainless Steel

NOTE: Model FL-1 Fusible Links are not rated for use in corrosive atmospheres.

LINK PART NUMBER	LINK YIELD TEMPERATURE	MAXIMUM AMBIENT TEMPERATURE
FL-1-165	165°F/74°C	100°F/38°C
FL-1-212	212°F/100°C	150°F/66°C
FL-1-286	286°F/138°C	225°F/107°C
FL-1-360	360°F/182°C	300°F/140°C

K: HT-129 through BT-189 models

- UL listed
- Minimum Load: 3 lbs. (1.36 kg.)
- Maximum Load : 50 lbs. (22.68 kg.)
- Corrosion resistant bronze construction

LINK PART NUMBER	LINK YIELD TEMPERATURE	MAXIMUM AMBIENT TEMPERATURE
314165	165°F/74°C	100°F/38°C
314212	212°F/100°C	150°F/66°C
314280	280°F/138°C	225°F/107°C
314360	360°F/182°C	300°F/140°C

BI-TORQ Valve Automation and our soldered fusible link manufacturers suggest the annual replacement of fusible links as part of scheduled plant maintenance.

CONTINUOUS POSITION INDICATION

This one-of-a-kind design incorporates one or two proximity switches as an integral part of the assembly, allowing a remote operator to continuously record the position of the valve. This is especially crucial in fire safe applications where valves need to be monitored as part of a process system. Special enclosures allow the switches to maintain position signal even in high temperatures.

(NOTE: Not available on all units.)

AUTOMATIC FIRING LINK

Our newest innovation allows an operator to manually trigger the armed fusible link when a voltage signal generates the heat necessary to cause the link to yield. This lets plant personnel shut down flammable liquid lines immediately even if a fire has started in another area. Please contact our technical sales personnel for more application information. (NOTE: Not available on all units.)
