

RECESSED BOX

For Strahman Washdown Hose Stations

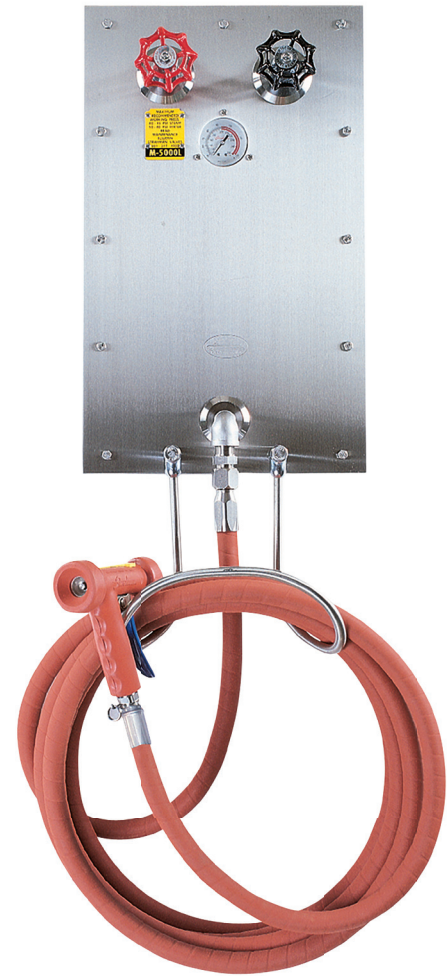

The Recessed Box Series is specifically designed to conceal hose station mixing unit piping, protecting it from dust, debris, and harsh environmental conditions. Constructed from high-quality, heavy-gauge stainless steel, this unit is ideal for new construction or facility upgrades that require a clean, professional installation.

Recessed wall box units are available with globe or angle valve entry.

Note: Mixing units, hoses, and nozzles are sold separately.

KEY FEATURES

- **Recessed Design:** Conceals internal components of mixing hose stations from dirt, damage, and tampering for improved longevity.
- **Durable Construction:** Corrosion-resistant, heavy gauge stainless steel withstands harsh environments and frequent washdowns for long-lasting performance..
- **Flexible Valve Entry Options:** Available in both globe and angle valve configuration to suit installation preferences.
- **Professional Finish:** Flush-mounted, clean and professional appearance delivering a sleek, integrated look ideal for commercial and industrial environments.
