

CEC-1000

For Strahman Washdown Hose Stations

The CEC-1000 Series Recessed Cabinet is engineered to enclose and protect your Strahman Mixing Hose Station—concealing all exposed piping and components to enhance cleanliness, safety, and visual appeal in demanding industrial environments.

Ideal for new construction but also easily adaptable to existing walls, this cabinet ensures secure, streamlined access to your water mixing system while shielding it from dust, debris, and environmental hazards.

Constructed of heavy-gauge stainless steel, the cabinet features a clean, flush-mounted design and opens a full 180° for unobstructed access during operation or maintenance.

KEY FEATURES

- **Recessed Design:** Conceals the entire mixing hose stations, reducing exposure to contaminants and improving facility aesthetics.
- **Durable Stainless Steel Construction:** Withstands harsh environments and frequent washdowns for long-lasting performance.
- **180° Swing Door with Flush Hinges:** Allows for full, easy access to equipment—ideal for fast servicing and daily operation.
- **Versatile Piping Access:** Pre-drilled holes for top or back entry simplify connection to your facility's piping system.
- **Drainage Hole Included:** Helps manage washdown runoff and maintain hygiene.
- **Professional Finish:** Improves facility appearance and supports compliance with sanitary standards.
