

STANDARD HOSE REEL

Industrial Hose Storage Designed to Support Clean, Safe Operations

Strahman's Spring Rewind Hose Reels, in carbon steel or stainless steel, make winding and rewinding our heavy-duty water hose quick and efficient, and provide tidy hose storage and protection.

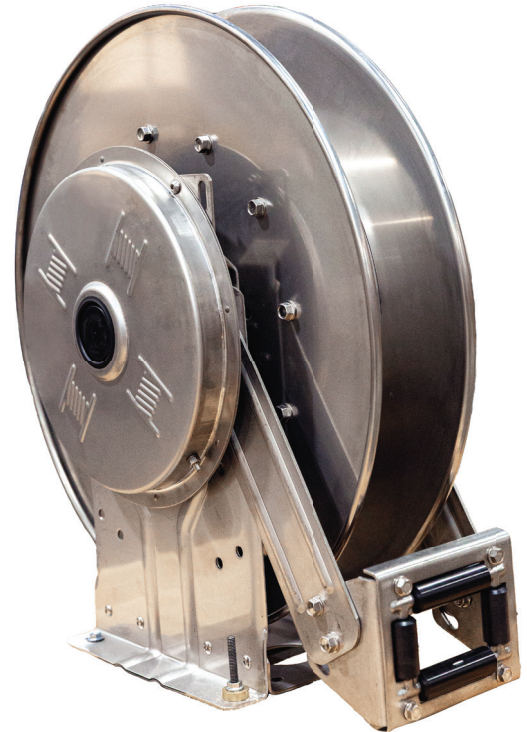

Our reels are equipped with a heavy-duty internal spring for effortless winding and rewinding. A sturdy ratchet assembly locks the reel when the desired length of hose has been pulled out; a gentle tug on the hose will unlock the reel and trigger the spring return to retract the hose.

These convenient and sturdy hose reels can be installed on the floor, wall or ceiling*. Strahman will install your choice of Premium or Extruded Hose Assembly including the ball stop to prevent damage to the hose reel rollers. Complete your washdown assembly with a Strahman washdown nozzle-hose and spray nozzle are sold separately.

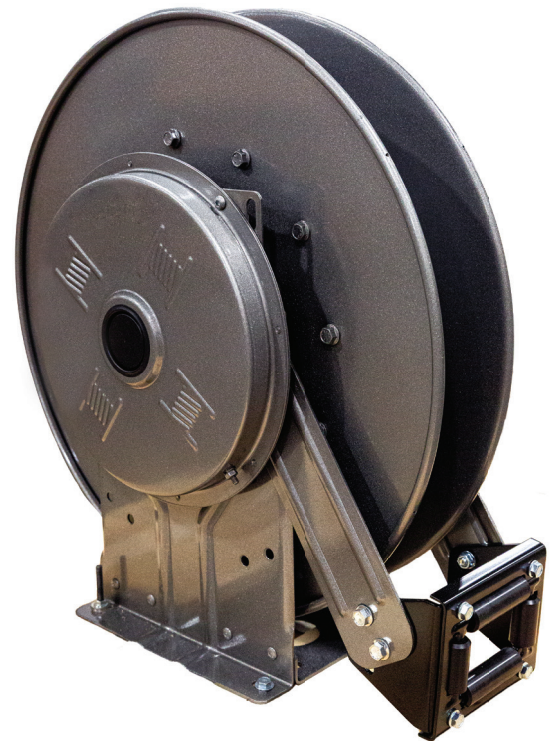

*Ceiling mount might require a special heavy-duty spring.

SPECIFICATIONS

- Two sizes are available: one that holds up to 50' of hose and the other holds up to 100' of hose
- Choose from Strahman's Premium Wrapped or Extruded Hose Assemblies
- Ball Stop is included with the hose to prevent roller damage
